SybaTek Achieves InfoComm International AV Provider of Excellence Distinction

Garden Grove, CA – June 8, 2015 – SybaTek has qualified as an InfoComm International AV Provider of Excellence, or APEX. The InfoComm APEX program is a marketing recognition program for integration companies and AV design consulting firms dedicated to upholding industry excellence by providing quality service to customers.

The InfoComm APEX program recognizes companies based on the number of employees holding key industry certifications, including InfoComm's CTS credential, completion of continuing education classes, and positive customer survey responses. APEX providers must also prove that they meet or exceed the requirements within 2 ANSI/INFOCOMM standards, the *Standard Guide for Audiovisual Systems Design and Coordination Processes* and the *AV System Performance Verification Standard*, to foster better communication between the AV provider and the client.

"The APEX designation gives AV companies a mark of distinction in the marketplace," said David Labuskes, CTS, RCDD, InfoComm International's Executive Director and Chief Executive Officer. "Customers of APEX companies can be confident of the AV provider's professionalism and commitment to ongoing training, customer service and dedication to excellence."

"We are pleased that our dedication to quality processes and performance has been recognized in this way" said Tom Peters, SybaTek's General Manager and Past President of InfoComm. "SybaTek is passionate about providing appropriate technology solutions built to industry standards and best practices. We are happy to join the growing list of firms who share these goals"

For more information on the APEX Program, visit infocomm.org/APEX.
